

Upwards and onwards

KM PRODUCT DESIGN BECOMING BIGGER AND BETTER

Dear friends,

We find ourselves at a significant moment in our journey. We are celebrating our 24th year in business.

During this time, we have established ourselves as the go-to industrial design consultants in South Africa. Our client base varies from start-up entrepreneurs to large international corporates, many of which have been serviced by us for many years.

WHAT SETS US APART?

Modern software can easily create fantastic-looking virtual products, but the real test comes when these thoughts are put into practice. At KM Product Design, we pride ourselves on offering a turnkey industrial-design service.

We have had the privilege of seeing our clients grow their businesses as a result of our well-designed products, which not only function well, but are also desirable. The best part of our efforts? The professional friendships we have built over the years.

BIGGER AND BETTER

We are proud to announce that we are joining forces with the well-known PIMMS Group. Although our core design-service offering will not change, we are now part of one of the top plastic manufacturing houses in Africa.

WHO ARE THE PIMMS GROUP?

Based in Johannesburg, South Africa, the PIMMS Group are a group of design-focused injection-moulding companies with a large-scale manufacturing facility and a comprehensive tool room. PIMMS Group creates unique moulded products, passionately pursuing clients' ideas. They are always looking for ways to make great ideas come to life and they thrive on the prospect of solving complex product conundrums. The PIMMS Group applies the same level of innovation to each project, regardless of size.

The PIMMS Group consists of PIMMS Manufacturing (the injection moulding division), PALLCHEM (mass-transfer products), SAFELOAD (plastic trucking supplies), Daneo Tooling Specialists (the tool and dye making division) and now, proudly, KM Product Design.

WHAT YOU CAN EXPECT

KM Product Design remains an independent design consultancy, headed by Tommy Fritz (Studio Manager) and Travis Maddocks (Business Development Manager). Stephen Stanley, head of the PIMMS Group, is the new Chief Executive Officer.

One great benefit is that our customers now have direct access to world-class manufacturing and tooling facilities. We will however, as always, honour all arrangements, which our clients might have with external third-party manufacturers and toolmakers.

OUR NEW HOME

We say goodbye to Edenvale, and our new home, as of 1 August 2017, will be situated at the PIMMS Group headquarters in Laser Park, Northern Johannesburg, a main business and manufacturing hub.

Our email and telephone contact details will remain the same.

A WORD FROM PETER DREYER

I would like to thank each and every one that played a role in making the last 24 years an unforgettable experience that fills me with a great sense of gratitude. Looking back, I sense a deeper understanding that all these relationships were a blessing from the Ultimate Designer, who lovingly created us with the abilities to do what we do.

My family and I have decided to relocate to New Zealand, where I am looking forward to having my family reunited on a permanent basis. (I am looking forward to spending more quality time with my family as the frequent traveling between our Johannesburg and KwaZulu-Natal branches had started to take its toll after 10 years.)

I will, however, remain in an advisory position for as long as needed to ensure that the handover is seamless.

Please feel free to contact any of the KM Product Design staff directly regarding any design or business matters.

Wishing you all the very best for the future!

Peter E Dreyer

Outgoing Company Owner

Kind Regards
